THE ALASKA CLUB

FOR EVERYONE'S PROTECTION

Please inform the front desk when your session is complete so the room can be disinfected after use.

Thank you for doing your part to keep us all safe.

THE ALASKA CLUB

WELCOME BACK MEMBERS & STAFF

The health and safety of our staff and members are our number one priority. In accordance with state and local mandates, we are taking the following protective measures. Thank you for your cooperation and let's get to the business of working out.

Entry Screening

Members and staff will be asked to have a noninvasive temperature check utilizing thermal body temperature.

- Any person with a temperature above 100.4°F will not be granted entry
- Any person with COVID-19 symptoms will not be granted entry

Social Distancing

Our facilities have been modified to optimize space for physical distancing.

- Queuing – areas of the facility will be marked for appropriate physical distancing
- Limited Capacity – signs are posted in each area of the club and members of our staff will supervise usage
- Staff and members are advised to practice physical distancing by standing at least 6ft away from each other

Personal Protective Equipment

- Team members will wear face coverings
- Every member of our cleaning team will wear gloves
- Members are encouraged to wear face coverings

Hand Washing & Hand Sanitizer

Members and staff are asked to sanitize their hands upon arrival and throughout their visit.

- Hand washing sinks are available in the locker rooms and equipped with soap and water
- Hand sanitizer is available throughout the facility

Disinfectants & Single-Use Sanitation Wipes

We use cleaning products and protocols which meet CDC guidelines and are approved for use and effective against viruses, bacteria, and other airborne pathogens.

- Disinfectants are available throughout the club for member and staff use
- Wipe down equipment before and after each use

Enhanced Disinfecting Procedures

High touch surfaces will be regularly cleaned each hour using a combination of large-scale sanitation systems:

- **Electrostatic Spraying & Fogging Systems** use a technology that helps ensure all surfaces are disinfected
- **Air Scrubbing** installations use air purification systems located in the HVAC ductwork transforming oxygen and water molecules into oxidizers and destroying 99% of all surface and airborne contaminants
- **Motion-Activated Technology** limits touchpoints throughout the club
